

Last December 22 we had a new meeting with the mayor and the architect of the council. In this meeting we were appeared by a sketch that will complete the remodeling of the park. In the above mentioned project one tries to add a space for the smallest as well as to condition the access to the walk of wood. In addition, it will be completed by a sidewalk broader than the current one and that will serve as point of item for the future walk along the river Lambre.
